Cary,

First, a big thank you! I did not anticipate the walls to be this nice or thick. It gives me a sense of real workspace. In these last eight months having to come up with a contained workspace to eliminate inevitable distraction from working remotely has been a challenge. The COVIDCUBE™ product is rock solid and I highly recommend it to any executive or professional in need of a remote office, workspace or partition. The easy to assemble fabricated system was also nice.

All the best.
